

# PolyNPlus™ Oilseed

A highly efficient foliar nitrogen for oilseed rape

Fertiliser Services

It is now widely accepted that oilseed rape needs additional nutrition in the spring when nutrients are running low or are less available due to dry conditions. Part of our revolutionary range of foliar fertilisers, **PolyNPlus Oilseed** is readily available to the plant. It is formulated with ureic polymers and contains key nutrients vital during the crop's rapid growth phase: nitrogen, sulphur, magnesium, manganese together with a balanced mix of micronutrients. **PolyNPlus Oilseed** is supplied in 1,000 litre IBCs.

## Benefits of PolyNPlus Oilseed

Using **PolyNPlus Oilseed** at full flowering enables you to maximise yield and oil content while increasing the nutrient use efficiency to virtually 100%.

**PolyNPlus Oilseed** ensures:

- Efficient absorption by the canopy
- Longer green leaf retention
- Essential nutrition during peak plant growth, and
- Longer post-flowering photosynthetic activity.

## Use with crop protection

**PolyNPlus Oilseed** can be tank-mixed with standard crop protection products, thereby reducing the number of passes needed and saving time and application costs - a bonus in these economically challenging times.

Analysis	w/v	
Nitrogen (N)	30%	
Sulphur (SO <sub>3</sub> )	12%	
plus magnesium, manganese, copper, boron, zinc and molybdenum		

## Application guidelines

For application at full flowering and pod set stages, apply 25-40 litres of **PolyNPlus Oilseed** per hectare diluted in 200-300 litres of water.
